Cost Savings Measure *“actual project”*

In coastal and other chemical environments, copper finned coils are often specified for longevity and seer rating.

Actual cost savings example:

Copper heating coils for 100 ton AHU =	\$22,000.00
Aluminum coils	\$11,000.00
With MicroGuard coating (10 yr warranty)	+ \$ 6,500.00

Savings

\$4,500.00
